interpretify

ONE PLATFORM

BENEFITS

INCREASED FLEXIBILITY

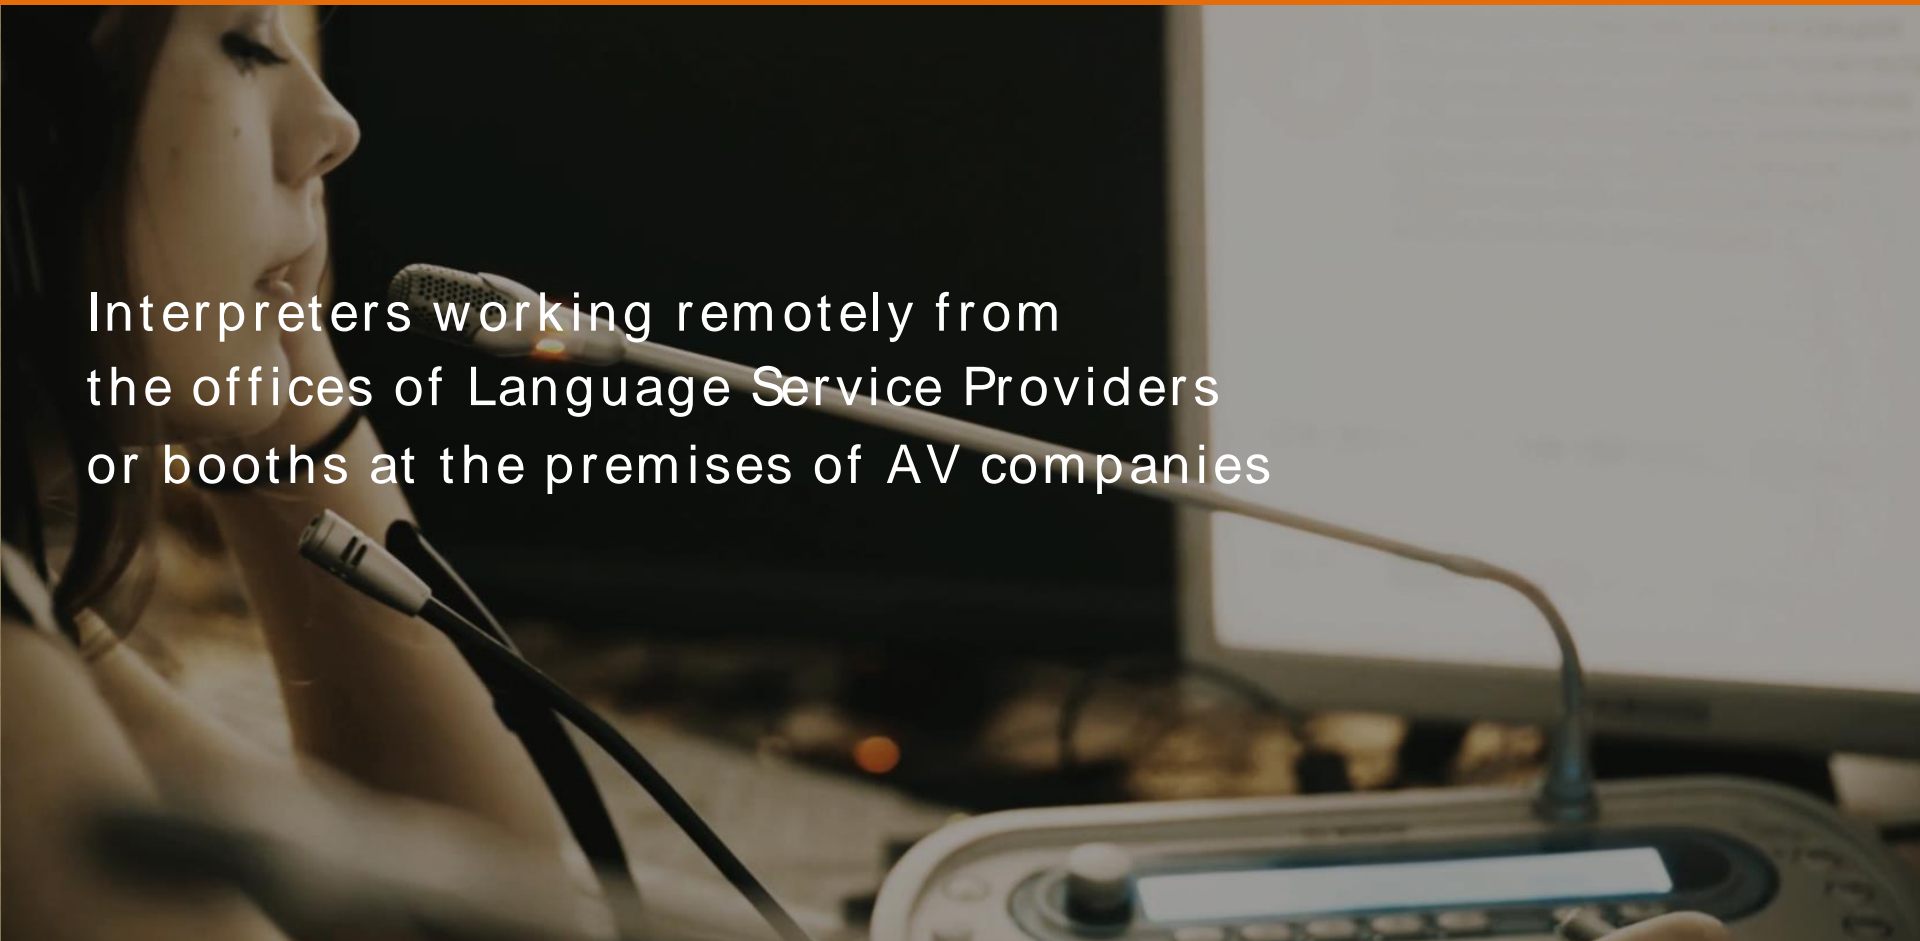

**Provide interpreting at any event, anytime,
anywhere, for any number of languages and
any size of audience.**

REDUCED COSTS AND LOWER COMPLEXITY

**Utilise the best interpreters worldwide
without additional logistics costs.**

A woman is shown in profile, speaking into a professional microphone. She is wearing a headset with a microphone. The background is a blurred office environment with a computer monitor and keyboard. The text is overlaid on the image in white.

Interpreters working remotely from
the offices of Language Service Providers
or booths at the premises of AV companies

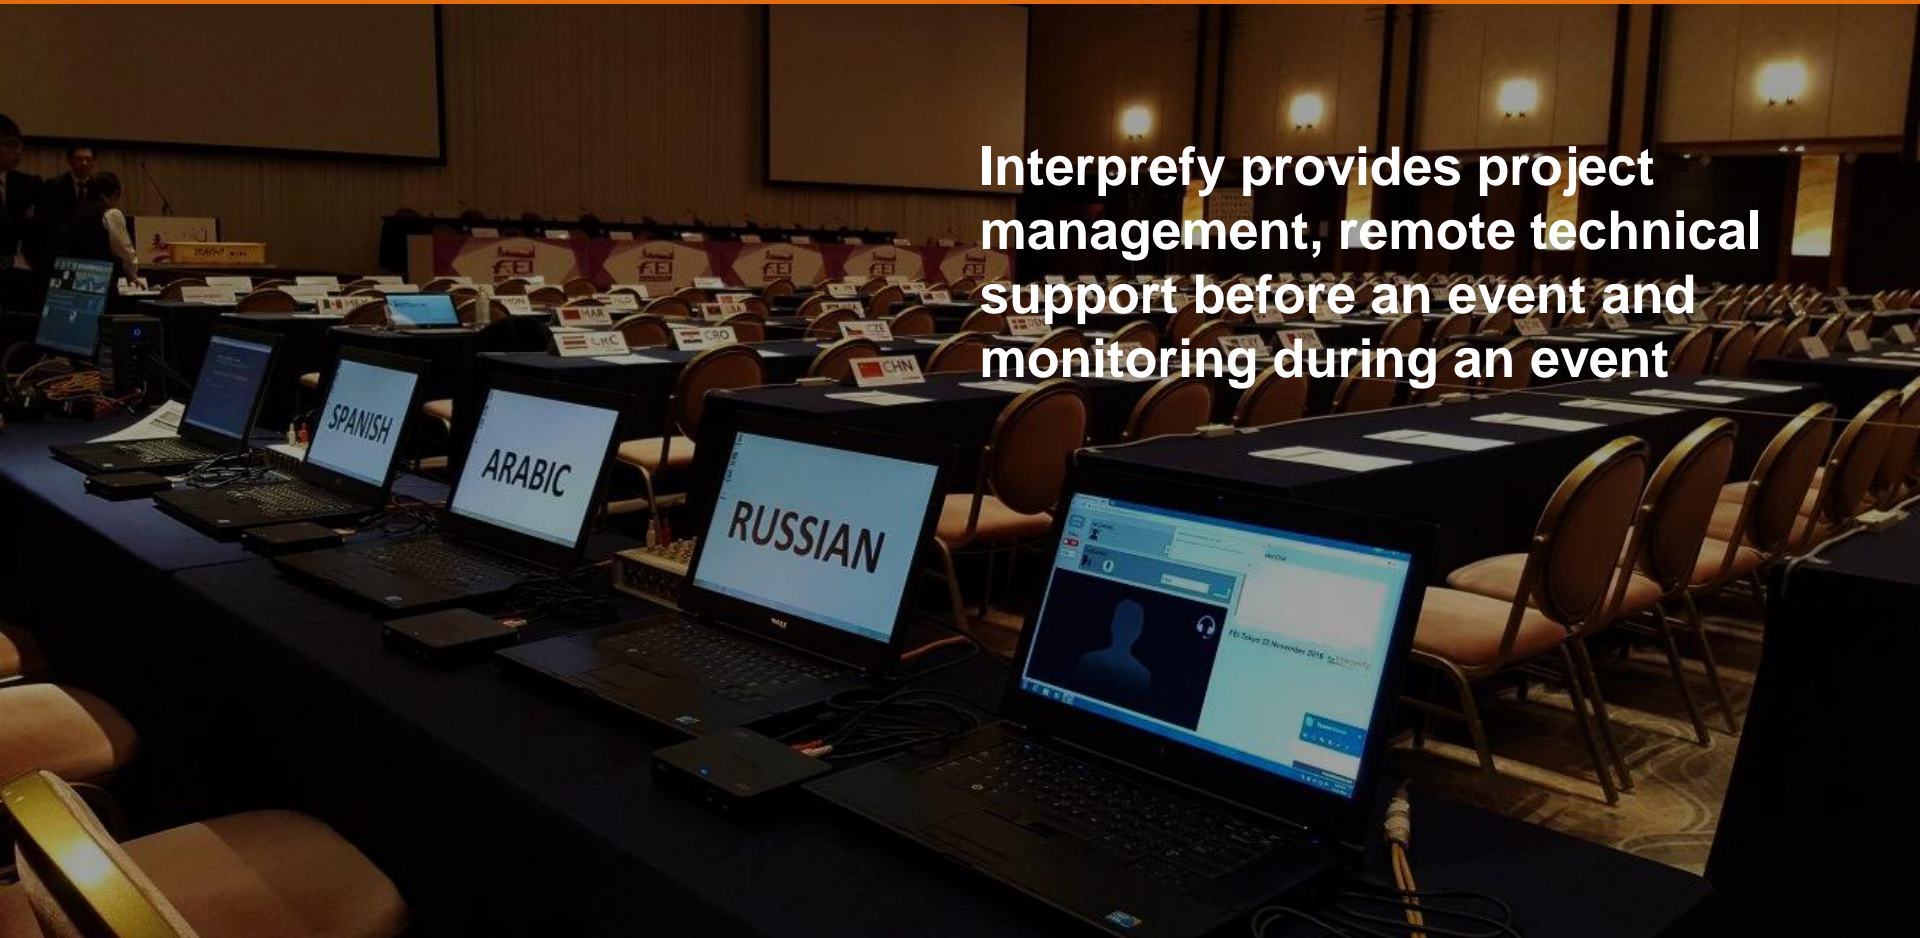

Participants use a mobile app on iOS/Android smartphones, tablets or laptops and listen to real interpreters via Wi-Fi or mobile data networks. If needed, traditional headsets with standard IR/radio receivers may also be used.

HIGH AUDIO AND VIDEO QUALITY

Full-band audio (with 20kHz bandwidth at 48kHz sample rate), which provides crystal-clear sound

Interprefy provides project management, remote technical support before an event and monitoring during an event

Protect the environment by reducing your CO₂ footprint and avoid the pollution generated by travelling.

BENEFITS: EFFICIENCY

✓ **COST-SAVING:**

Utilise the best interpreters worldwide and reduce the total cost of the interpretation for an event by up to 75%.

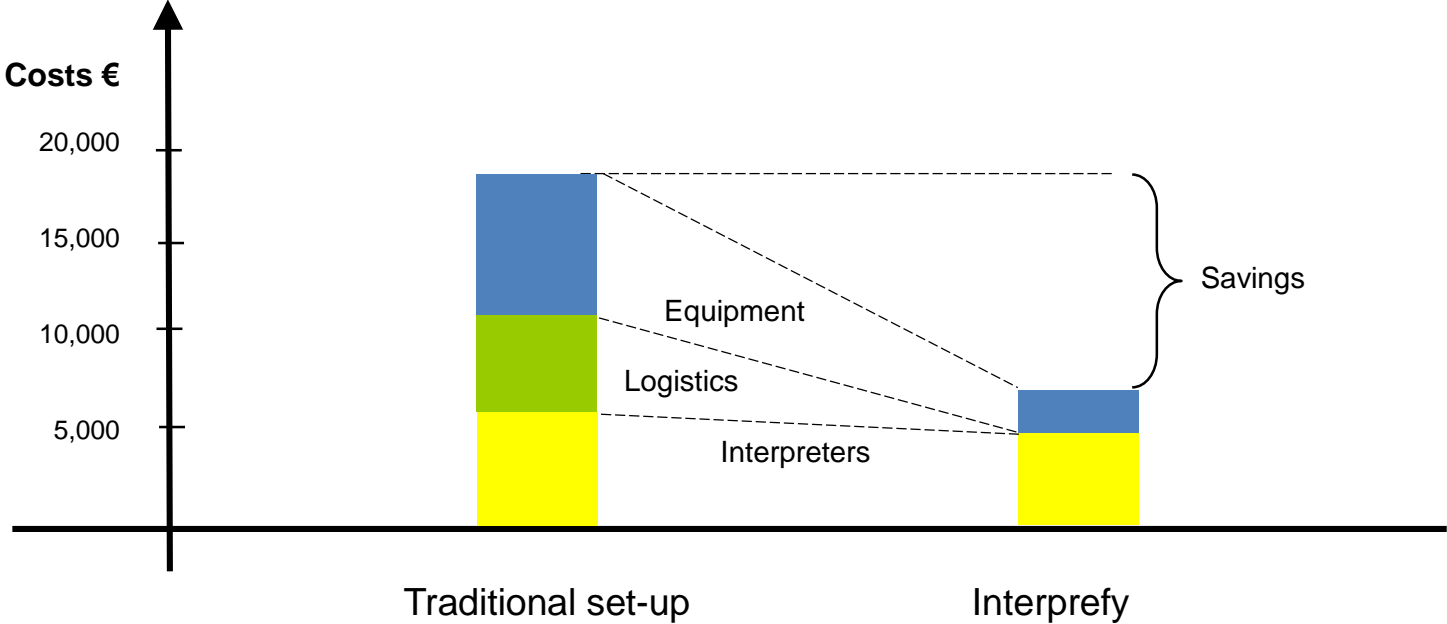

✓ **REDUCED LOGISTICS:**

no more hassle and additional overhead costs to cover accommodation and travel expenses for interpreters

✓ **ECO-FRIENDLY SUSTAINABLE INTERPRETING:**

protect the environment by reducing your CO2 footprint and reduce the pollution generated by travelling

COST COMPARISON - INTERPREFY VERSUS TRADITIONAL

TECHNICAL REQUIREMENTS

Source/Floor/Speaker

Minimum 4Mbps upload per video channel, audio included

Interpreters

Minimum 2Mbps down and upload per language channel

Audience

- If smart devices (laptops, tablets, smartphones) are used: minimum 0.5Mbps download per device
- If attendees connect through standard broadcasting equipment and radio/IR headsets, minimum 2Mbps download per language channel is sufficient

Ping on any connected devices should be below 50ms to the nearest major hub, in order to keep latency low (use www.speedtest.net to measure it)

Source/Floor/Speaker

- Laptop (core i5, 4Gb RAM, windows 7 or higher recommended) with professional microphone connected
- Smartphones/tablets: Android 4.2 and higher, iOS 8.0 and higher, or laptop connected to on-site PA system via sound card
- Soundcard with Cinch or optical connectors, connected to the audio input. Sound Blaster X-Fi HD is recommended, but Behringer U-Control
- UCA222 or Numark Stereo IO USB can also be used Plug-and-Play USB video capture card for transmission of video feed from the event. Magewell HDMI-to-USB or SDI-to-USB capture cards are recommended; alternatively, webcams can be used (Logitech BCC950, Logitech PTZ Pro, etc.)
- Ethernet cable connection is strongly recommended

Interpreters

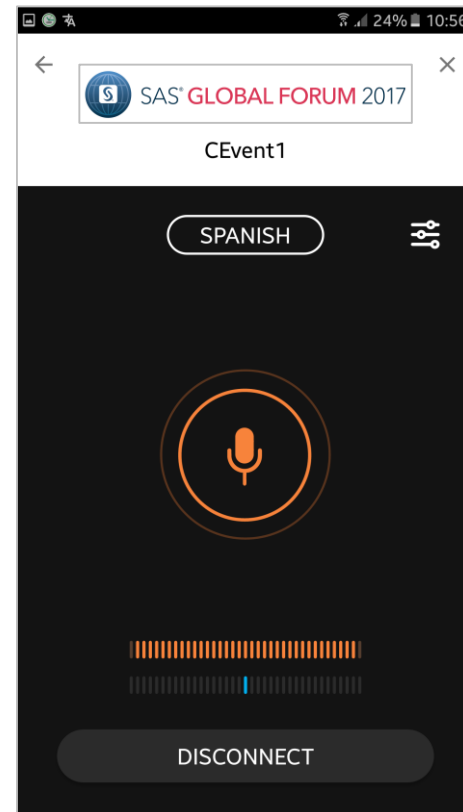

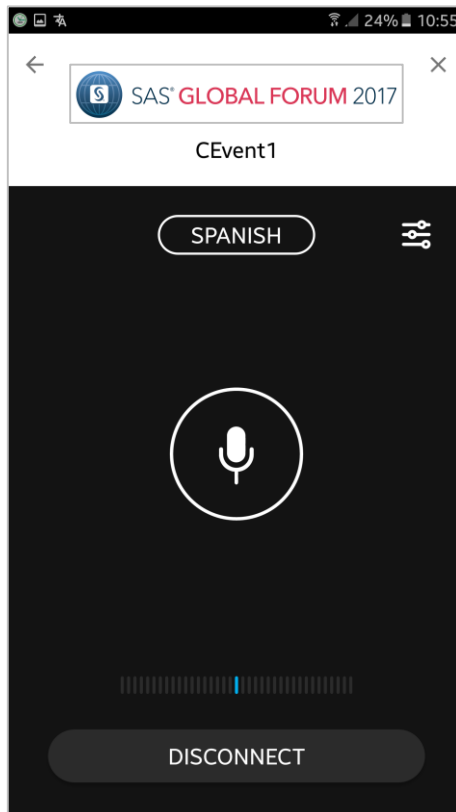

- Laptops: Core i5, 4GB RAM, windows 7 or higher; USB headset with noise cancelling, to prevent the sound from the ear pad being picked up by the microphone – Logitech H390 is recommended
- Optional: professional interpreting panel, laptop connected to on-site PA system
- Ethernet cable connection is obligatory

Audience

- Laptop (Chrome installed)
- Smartphones/tablets: Android 4.2 and higher, iOS 8.0 and higher, or
- IR/Radio headsets, laptop connected to on-site PA system
- An audio Y-splitter can be used to increase the number of users with the same number of smart devices

Summit for global tech company

November 2018

Silicon Valley, California

This was a large summit with a jam-packed agenda consisting of conference-style presentations, product demonstrations and smaller break-out sessions. The event was spread across 10 break-out rooms, and an impressive 102 interpreters working across 13 languages, delivered through the Interprefy platform.

World Congress of Accountants

November 2018

Sydney, Australia

The congress, which was spread over four days, saw more than 3,000 attendees. The speakers presented in English, with Interprefy providing seven languages to audience members, who listened to their chosen language on high quality audio streaming through their smart devices. There was also a panel discussion where panellists and audience listened to Mandarin-English translation, and radio headsets used in combination with smartphones. Interprefy provided onsite support prior to, and for the duration of, the event.

myclimate events: climate change, innovation and energy efficiency

November 2017 & June 2018

Zurich, Switzerland

One of the main advantages of Interprefy's remote simultaneous interpreting solution is that interpreters don't need to travel, saving huge amounts of carbon emissions in travel, logistics and accommodation. These were major benefits for using sustainable and innovative Interprefy solution by NGO myclimate.
