This InfoGuide was created by the LT_Observatory project, funded by Horizon 2020.

Main contributors were [Dr. Margaretha Mazura](#) and [Bujana Balla](#), both European Multimedia Forum – [EMF](#) and [ZABALA](#)

1. EXECUTIVE SUMMARY

This document gives an overview as well as practical information about the availability of European Structural and Investment Funds (ESIF) for the use of language technology projects. ESIF are funds distributed by the EC to the EU Member States but administered by the country or region in question. This fragments the information and it is therefore a complex process to find relevant information. This document includes information about 25 EU Member States (except Luxembourg, Bulgaria and Croatia where no relevant information could be obtained until now) and some of their regions. While application schemes vary from region to region and country to country, in most cases one applicant is sufficient, which makes project applications easier than in a Horizon2020 project where the European added value and cross-border cooperation is a prerogative.

Overall, it can be said that ESIF Thematic Objectives as identified by Member States give opportunities to include elements of LT, mostly in verticals such as eHealth and wellbeing, competitiveness of SMEs, tourism and cultural sector. There are some countries where language technologies are already funded or expressly welcome e.g. Bavaria (Germany), Greece, Ireland, Latvia, Lithuania, and Wales (UK).

Some countries or regions that were contacted, were very positive about the idea of including LT, e.g. Finland, Lorraine (France), Greece, Hungary, Poland, Spain and Scotland (UK).

From all information gathered, it is worthwhile for companies and research institutions to establish a link to national/regional institutions that administer ESIF (in particular ERDF) to tap on this funding source. There is a general willingness and open mind to innovative solutions (in whatever sector or context) and such proposals will most probably receive some attention and, eventually, some funding.

2. METHODOLOGY

The InfoGuide is structured in the following way:

- *Introduction to ESIF funding*
- Per country, the following information is given:
 - *Info about the competences (federal/regional)*
 - *Information obtained from the respective institutions*
 - *Name of contact person*
 - *Link to contact details of these institutions (S3 and, where applicable, national/regional websites)*

For the Managing Authorities, the website of [DG REGIO](#) was used.

For smart specialisations within the Operational Programme, the [S3 Platform](#) was used.

The contact details are put into Annexes to this document.

3. ESIF FUNDING FOR LT

3.1 INTRODUCTION TO ESIF

ESIF – European Structural and Investment Funds - comprise ERDF – European Regional development Fund (supports all TO but main focus on TO1-4), ESF – European Social Fund (Support all TO but main focus on TO5-11), the Cohesion Fund (supports TO4-7 and 11); the European Agricultural fund (EAFRD) and the European Maritime

Fund (EMFF). For the purpose of LT, main fund is ERDF (with ESF potentially in the education area, e.g. multilingualism in SMEs in the ambit of lifelong learning).

These funds will be allocated to priority areas, in accordance with the strategic programming documents: the Partnership Agreement and the Operational Programmes that are the result of a process of consultation between the Commission and the EU Member States. Partnership Agreements are high-level documents that indicate with statistics why countries decided on which priorities, and give an indication about the total sum of EUR that will be used to implement the programme. They are most often in the official language of the country and not always translated (summaries and press releases are also in English). The Commission (DG REGIO) negotiates the PA and each Operational Programme which lays down the priorities by country and/or region.

Partnership Agreements

Operational Programmes: On this page, one can search Operational Programmes by country, region and thematic objective!

Operational Programmes can be national, regional or topical (that are cross-regional). Some countries mix these options which results in complex and fragmented programmes.

The 11 Thematic Objectives for the period 2014-2020 are:

TO1 R+D+I

TO2 ICT

TO3 SME competitiveness

TO4 Low carbon economy

TO5 Climate change

TO6 Sources efficiency

TO7 Transport and infrastructure networks

TO8 Employment and mobility

TO9 Inclusion and equality

TO10 Education and lifelong learning

TO11 Public administrations

For details, you can consult [here](#).

In the Thematic area of R+D+I (TO1), the Member States/Regions had to indicate “[smart specialisations](#)” priority areas that will make the region more competitive, more innovative for regional development and growth.

ESIF funding goes over the same period as Horizon2020, i.e. 2014 to 2020 (7 years). Rules to obtain ESIF funding are quite different from Horizon2020 funding, due partially to the different scope: regional development and growth as opposed to research and innovation at EU level for Horizon 2020. ESIF funding are subject to competition rules which often results in lower % of funding for companies. In an attempt to enhance the impact of activities, DG REGIO issued a “[Synergies guide](#)” (that point out the possibility of “joint funding” or complementary funding of actions that could fall under a Horizon2020 topic and at the same time, for one or more partners, into ESIF funding. While this is an interesting option, the implementation means careful timing and a good overview of which region foresees “windows of opportunities”. This guide should help to find out where some potential funding for LT from ESIF is possible.

Below the information by EU Member State (alphabetical order in English). All countries where feed-back was received are included, even though in some cases, the answer is not always encouraging. Two Member States – Bulgaria, Croatia and Luxembourg – are not included as no feedback could be obtained. Where regions responded, they figure below the Member State in question. Where no specific information was received, the link to the region with smart specialisation on the S3 platform was made.

4. COUNTRY INFORMATION

Each country information provides information and links to national features, followed by regional or topical ones, where appropriate.

4.1 AUSTRIA

Despite of the Federal character of Austria, it has one [Operational Programme](#) for the entire country.

ERDF programme for Austria:

One funding line (M9_KMU_IP3d_MN1) promotes the adoption of new technologies in SMEs, amongst others in the tourism sector. This may be an opportunity to provide multilingual end user tools to such SMEs.

Priority topics of Austria include:

ICT and service innovation (e.g. tourism, see above). These may provide opportunities for LT.

The Austrian research promotion agency ([FFG](#)) announced on 17 December 2015 a [new funding programme](#) for SMEs and large enterprises, based on ERDF funds: EFREtop (currently only in German).

For the period 2014-2020, 41 MEUR come from EFRE and additional 10 MEUR from FFG. Industrial research projects and experimental development projects can be submitted any time. Max. funding 50%/1 MEUR for industrial research projects and 25-45%/3 MEUR for experimental research. Austrian companies (exception: those based in Vienna) can apply for funds.

[Contact](#)

[Forms and documents](#)

S3 priorities of other regions:

[Niederösterreich](#)

[Oberösterreich](#)

[Wien](#)

4.2 BELGIUM

In Belgium, [ESIF](#) is administered by the three regions: Bruxelles Capitale (the region of Brussels), Walloon (French-speaking) and Flanders (Flemish speaking).

4.2.1 BRUSSELS REGION

LT as such weren't a priority in our Smart Specialization. A call for proposals has been organized in 2014 and under ERDF; no more funds are available in this programming period.

Selected projects can be found [here](#).

There might be a new call (if money is still available) but it is not sure.

Contact: Beata Bibrowska, EU RDI projects Advisor, Strategic Research Team, Scientific Directorate [S3 priorities](#) for Brussels region.

4.2.2 FLANDERS

Desk research identified priority topics of Flanders that include:

Specialised industrial value chains and logistical services for food, pharma, recycling, off shore maintenance, etc. These are topics that might be of interest to Big Data and therefore indirectly, to LT. Furthermore, ICT research and development, Personalized medical and social care as well as Media and digitalisation of cultural heritage could involve elements of LT.

[S3 priorities](#) for Flanders region.

4.2.3 WALLOON

In Walloon, a second call for ERDF proposal was opened on 1 December 2015 but does not contain topics where LT can be included. For details and future calls you can consult [here](#).

Contact: Florence Hennart provided information on potential LT players in Walloon that will be included in D3.3 (National and regional funding opportunities).

[S3 priorities](#) for Walloon region.

4.3 CYPRUS

Cyprus has one national [Operational Programme](#).

Identified priority topics of Cyprus include:

Tourism: sustainable tourism, alternative forms of tourism, digital tourism applications, management and promotion of tourism product.

Cyprus funds devoted to Smart Specialisation Strategy are on a competitive basis, mainly through the Cypriote Research Promotion Foundation where further information can be found [here](#).

A call for proposals is planned at the beginning of 2016.

Contact: Savvas Zannetos

[S3 priorities](#) of Cyprus.

4.4 CZECH REPUBLIC

The Czech Republic has one [Integrated Regional Operational Programme](#), sub-regional programmes (e.g. Region of Prague) and topical sub-programmes (that are nation-wide; e.g. environment, enterprise, transport, research).

[S3 priorities](#) include manufacturing industries with verticals mentioned like automotive and aerospace, ICT with automatisation and electronics, as well as Healthcare and medical technology and devices.

4.4.1 PRAGUE REGION:

S3 priorities include Digital media, mobile applications, visualisation and design, production & distribution of media products in the area of creative and cultural arts and entertainment.

There are 2 operational programmes supporting R&D&I in Prague:

[Operational Program Research](#), Development and Education and Operational Programme Prague – Growth Pole of the Czech).

Neither of these programmes does include specification of supported specialization. This will be done through future calls, most likely no sooner than in 2018.

The Operational Programme Entrepreneurship and Innovation is not available on Prague territory.

Contact: Jakub Pechlát

[S3 priorities](#) for Prague region.

S3 priorities of other regions:

[South Moravian Region](#)

[Moravskoslezsko](#)

4.5 DENMARK

Denmark has one national [Operational programme](#):

Identified priority topics of Denmark include:

Tourism and experience based economies, as well as ICT and digital growth.

[Overall S3 priorities for Denmark](#)

4.5.1 MIDTYLLAND

The region of Midtjylland has no projects regarding LT. Identified priorities there include:

Welfare innovation including eHealth, tourism and related cultural and creative industries, as well as eSkills developments. These topics may include LT elements.

Contact: Pia Fabrin

[S3 priorities](#) for Midtjylland

S3 priorities of other regions:

[Nordjylland](#)

4.6 ESTONIA

Estonia has one national [Operational Programme](#):

Identified priority topics of Estonia include:

Person-centered health information management (healthy ageing), and ICT as horizontal technology.

[Overall priorities for Estonia](#)

ESIF funds are managed by the [Estonian Development Fund](#); information is available in Estonian and English:

4.7 FINLAND

Finland has two [Operational Programmes](#) – one nation-wide and one for the autonomous province of Åland. However, regions identified S3 priorities. Main regions with feed-back are:

4.7.1 REGION: ETELÄ-POHJANMAA

Language technologies could be seen as an industry that could fit to their RIS3. However, so far none of the region's companies or development organizations have approached them with this theme. There is an organization called Eptek (South Ostrobothnia Health Technology Center) which could perhaps be interested in testing LT in eHealth. They work in close co-operation with municipalities and health care providers. At the moment they are also participating to an international health technology project called Nordic Telemedicine Center.

Contact: Jaakko Hallila

[S3 priorities](#) for Etela-Pohjanmaa region.

4.7.2 REGION: Satakunta

Their smart specialisation has a focus on people oriented solutions which also includes approach for technical solutions to social innovations. The target set for the Satakunta Regional Plan (Handbook on Future of Satakunta 2035) is a "Good life in Satakunta 2035." There are three regional development themes leading to this target: encouraging community, pure vitality and people-oriented solutions. The issue is approached in the Regional Programme in a four-year time span, from the perspective of Satakunta's competitiveness and vitality. Seven strategic regional focuses have been chosen. The lobbying priorities laid down in the Regional programme are longer-term targets, in addition to which topical issues will be responded to by promoting the interests of Satakunta. Development activities are to be implemented through multiple funding sources; funding possibilities are raised in conjunction with the priorities. The Regional Programme is made more specific every second year by compiling Regional Programme Implementation Plans. The EU structural funds (ERDF and ESF), the European Agricultural Fund for Rural Development (EAFRD) and the European Maritime and Fisheries Fund (EMFF) are the major sources of funding for Satakunta when implementing the regional programme. Since 2014, Satakunta has been involved in the EU-funded Central Baltic programme.

Contact: Katja Laitinen

[S3 priorities](#) for Satakunta region.

4.7.3 PIRKANMAA

Language technologies are indeed related to many fields in their smart specialization strategy. If there are any companies or research units interested to invest in their region they can contact the local and regional players e.g. universities and development companies.

Here are some useful links:

<http://www.hermiagroup.fi/its-factory/>

<http://www.uta.fi/sis/tauchi/about.html>

<http://www.finnmedi.com/in-english/>

Contact: Jukka Alasentie

[S3 priorities](#) for Pirkanmaa region.

4.7.4 HELSINKI-UUSIMAA

Language technologies do fit our smart specialization strategy in many priorities. Depending on the approach it could be in smart citizen, digitalizing industry or health and wellbeing.

The financing of such a project would be more challenging. It could come from different sources; EU instruments or nationally from Tekes (Finnish Funding Agency for Innovation).

For 2014-2020 there are about 50 million euro for the region in structural funds programme (ERDF and ESR together). With equal amount of national public co-funding the total volume of the program in our region is about 100 million euro.

The thematic objectives in ERDF are:

- Enhancing the competitiveness of SMEs,
- Producing and using new information and knowledge,
- Promoting low carbon economy,
- Employment and labor mobility,
- Education, skills and lifelong learning,
- Social inclusion.

The overarching theme is promoting a low-carbon economy.

The projects that are financed with ESIF funding are quite practical, not pure research as such or product development projects as such. The competition is hard and only few applications are financed.

Contact: Kristiina Heiniemi-Pulkkinen

[S3 priorities](#) for Helsinki-Uusimaa region.

The [national website](#) provides information in Finnish, Swedish and English.

S3 priorities of the other regions:

[Lappi](#)

[Etelä-Savo](#)

[Etelä-Suomi](#)

[Kainuu](#)

[Keski-Suomi](#)

[Päijät-Häme](#)

[Pohjois-Karjala](#)

[Pohjanmaa](#)

[Varsinais-Suomi](#)

4.8 FRANCE

Priorities in France are set by region with [Operational Programmes](#) and Regional Programmes as well as interregional programmes. An overview of all the programmes can be found at:

4.8.1 PICARDIE

Even if in a part of our S3 strategy, called “humanités numériques” (digital humanities), language technologies could theoretically be included, in fact, no research activity can be identified in this field. At the most, a very small number of scientists in universities have light partnerships with groups in Paris universities.

So one may consider that language technologies are not a part of our specialisation domains and that a research group or a company cannot apply for ERDF fund.

[S3 priorities](#) for Picardie.

4.8.2 NORD - PAS-DE-CALAIS

Find information concerning common topics between our RIS3 (http://cordis.europa.eu/nord-pas-de-calais/home_en.html) and « language technologies ».

Contacts:

- [TRANSPORTS AND ECOMOBILITY](#)
- [AMBIENT INTELLIGENCE AND INTERNET OF THINGS](#)
- [DIGITAL IMAGES AND CREATIVE INDUSTRIES](#)
- [E- HEALTH - EXCELLENCE HEALTH CLUSTER](#)

Contact: Jean-Christophe GODEST

[S3 priorities](#) for Nord-Pas-De-Calais.

4.8.3 LORRAINE

The region checks the innovative characteristics of the project and LT may well be considered innovative.

The Regional Council of Lorraine already funded a project in the area of LT (end of the project: 31/12/2015).

A new project, with respect to innovation, could match the second strategic activities domain of our Smart Specialization Strategy (Future Factory). As such, the project will be examined by the innovation team of the Regional Council of Lorraine and might be funded with ESI.

Contact: Gérard Bahloul

<http://s3platform.jrc.ec.europa.eu/regions/FR41/tags/FR41>

S3 priorities of other regions:

[Alsace](#)

[Aquitaine:](#)

[Basse-Normandie](#)

[Bretagne](#)

[Center](#)

[Corse](#)

[Champagne-Ardenne](#)

[Rhône-Alpes](#)

[Franche-Comté](#)

[Languedoc-Roussillon](#)

[Limousin](#)

[Provence-Alpes-Côte d'Azur](#)

[Rhône-Alpes](#)

4.9 GERMANY

Priorities in Germany are set by region with [Operational Programmes](#). An overview of all the programmes can be found at:

4.9.1 BAYERN

Language technologies are covered by Bavaria's regional innovation strategy for smart specialization. Generally there are various programs available for funding of projects, depending on the specific topic of the project. An enterprise or a research institute that wants to develop a project regarding language technologies should contact "[Haus der Forschung](#)" for information about eligible European, national and regional funds.

Contact: Fabian Kyrein

[S3 priorities for Bayern](#)

4.9.2 WESER-EMS

The region of Weser-Ems is not aware of any specific activities in Language Technologies. However, they provided fields of competence and specialization at their website: www.weser-ems.eu

Contact: Dieter Meyer

[S3 priorities](#) for Weser-Ems.

4.10.1 Berlin

The name of the Berlin funding program is "ProFIT - Programm zur Förderung von Forschung, Innovation und Technologien", which is co-financed by European Regional Development Fund (ERDF). In accordance with the guidelines the federal state of Berlin gives grants or loans - primarily for small and medium-sized companies but also for research institutes - for projects in the areas of industrial research, experimental development, and production development, market preparation and launch. The focus of public funding lays on the technology fields of Berlin's smart specialization strategy. These are technologies in the field of:

- Information- and communication, media and creative industries,
- Health economy (Health care, telemedicine, health tourism etc,
- Transport, mobility and logistics (traffic telematik, automotive, rail transportation technology, aerospace etc,
- Power engineering (renewable energies, energy efficiency, energy storage),
- Photonics.

But the [ProFIT-Programm](#) is also open for applications for R&D-projects in other fields of technologies as well. For this it is imaginable to support the development of language technologies too, if the preconditions and requirements of the guidelines are fulfilled.

In addition is it possible, that those language technologies are developed as application within the above mentioned main technology fields, which are important for the capital region of Berlin / Brandenburg, like for instance e-health, mobile apps development.

More information about the funding conditions and procedures you can find on

[S3 priorities](#) for Berlin.

Contact: Jane Ulle

S3 priorities of other regions:

[Baden-Württemberg](#)

[Brandenburg](#)

[Sachsen](#)

[Sachsen-Anhalt](#)

[Thüringen](#)

[Mecklenburg-Vorpommern](#)

4.10 GREECE

Priorities in Greece are set by region with [Operational Programmes](#) and one thematic programme regarding Public Administrations. An overview of all the programmes can be found at:

4.10.1 NORTH AEGEAN

Speech technology is a very "hot" research topic and can be enrolled in any automatic multilingual customer care system (eHealth, Tourism). Therefore you could find an opportunity within our smart specialization strategy. What you have to do is to be in touch whenever you see an open call from our special managing authority of North Aegean: <http://www.pepba.gr>

Contact: Theologos Athanaselis

[S3 priorities](#) for Northern Aegean.

S3 priorities for other regions:

[Eastern Makedonia, Thrace](#)

[Attiki](#)

[Dytiki Ellada\(Western Greece\)](#)

[Ipeiros\(Epirus\)](#)

[Kentriki Makedonia\(Central Macedonia\)](#)

[Kriti\(Center\)](#)

[Ionia Nisia](#)

4.11 HUNGARY

Hungary sets its priorities by thematic [Operational Programmes](#) that can be found at:

In Hungary – and also in the region North Hungary – there is no dedicated financing for language technologies, but such projects could be financed in the framework of R&D projects from Economic Development and Innovation Operational Programme 2014-2020 (GINOP), especially in case of following priorities:

- Priority axis 1: Increasing competitiveness of SMEs
- Priority axis 2: Research, technological development and innovation
- Priority axis 3: ICT developments
- Priority axis 8: Financial instruments

Contact: Filep Reka

Overall [S3 priorities](#) for Hungary.

Therefore, while regions are registered at the S3 platform for Hungary, the administration of ESIF and S3 is centralized at the [National R&D Innovation Office](#)

According to the National Smart Specialization Strategy of Hungary, Infocommunication technologies and services are described as a horizontal priority nationally – not just on regional level. Infocommunication technologies extensively encompass and support the sectorial priorities. The following solutions can be such ICT solutions that cannot be linked to sectorial priorities in an unambiguous way or can be linked to more sectors (these are just a few examples, not an exhaustive list):

- smart business, company, home
- smart city
- information security, security technology
- gamification, simulation and optimization technology
- e-learning systems
- big data
- data mining
- software development
- cloud computing
- intelligent transport
- development of mobile applications, location-based services
- “Internet of things”
- future internet
- remote sensing
- machine learning

Besides that, healthy society and wellbeing is identified as a sectoral priority. The priority wants to cover the entire health care industry innovation chain ranging from the better understanding of the diseases, through prevention and recognition, to curing and personalized doctoring. Development of equipment and instruments linked to the above, which are necessary for healing. All in all, if there is a link between Language Technologies and ICT (e.g. related to machine translation, speech recognition, speech to text, language resources for multilingual apps, data

analytics) and maybe between health, it could be eligible for ERDF (ESIF) funds. In case of further questions, or contact to possible partners, please do not hesitate to contact us.

Contact: Kata Czakó

4.12 IRELAND

Ireland has two [Regional Operational programmes](#) for the Border, Midland and Western Regions, and the Southern and Eastern region.

Language Technologies are definitely encompassed by the Smart Specialisation strategy - specifically in the Priority Area C: *Digital Platforms, Content and Applications*.

On the matter of funding it is best to contact the Northern and Western and/or the Southern Regional Assemblies. The Regional Assemblies are best placed to advise on funding opportunities under their Operational Programmes. Contact details can be found from [here](#).

[Southern Regional Assembly](#)

Contact: Michael Clifford

Overall [S3 priorities](#) for Ireland.

4.13 ITALY

Italy has laid down its priorities in National Thematic Operational Programmes and Regional Operational Programmes. 9 national operational programmes (OP): Research and innovation, Education, Enterprise & Competitiveness, Infrastructure & Networks, SME Initiative, Metropolitan cities, Culture, Legality, and Governance & Institutional Capacity.

And Operational Programmes for the 21 regions and autonomous provinces. The key priority areas for these programmes are:

- innovation and research;
- digital agenda;
- support for small and medium-sized enterprises;
- Low-carbon economy.

For a full list, consult [here](#).

These programmes can be very specific, e.g. the programme on “SME Initiative” foresees to use ESIF for Financial Instruments (loans) to raise SME competitiveness in the Mezzogiorno of Italy while regional programmes (e.g. Trento) may also include SME competitiveness. This adds some complexity to the use of ESIF in Italy.

4.13.1 PROVINCIA AUTONOMA DI BOLZANO/BOZEN

Language, translation and multilingual environment are certainly an issue in this region, which has been particularly researched by the [European Academy of Bozen](#), a research center also funded by our public authority.

About possibilities of funding, the Autonomous Province of Bozen supports the local research centers settled on the territory or, in some cases, the ones based on the neighboring areas (i.e. Trento or Innsbruck).

[S3 priorities of Bolzano](#)

[Valle d'Aosta/Vallée d'Aoste](#)
[Veneto](#)

4.14 LATVIA

Latvia calls its national [Operational Programme](#) “Growth and Employment” that is aligned to the objectives of Europe 2020. Currently, Latvia is financing projects in the field of Language Technology. The company which is developing projects in regard to Language Technology is called [TILDE](#)¹ and is the main player in this field. In this region Language Technology is a priority and the next call for proposals will be in January 2017.

Contact: Kristos Somi

Overall [S3 priorities](#) for Latvia.

4.15 LITHUANIA

Lithuania has one [Operational Programme](#).

Language technologies are encoded into [Lithuanias RIS3 priority](#) “Advanced electronic contents, content development technologies and information interoperability” see that encourages the development of semantic technologies. An enterprise or a research institute that wants to develop a project aimed to develop such technologies should apply to the Ministry of Education and Science or Ministry of Economy funding schemes. All calls will be announced [here](#). Calls are currently under the final preparation.

Contact: Ms. Jurgita Petrauskienė

Overall [S3 priorities](#) for Lithuania.

Information on the [national website](#) is available in Lithuanian and English.

4.16 MALTA

Malta has two [National Operational Programmes: Fostering a competitive and sustainable economy to meet our challenges](#) and [Stimulate private sector investment for economic growth](#)

The feedback received from S3 was that language technologies do not fit within their smart specialisation strategy as it currently stands. However, when checking out the priorities, they include ICT in health, digital gaming, financial services and tourism product development, all areas where there could be room for LT.

Contact: Nadine Castillo

Overall [S3 priorities](#) for Malta.

4.17 NETHERLANDS

The priorities of The Netherlands are laid down in 4 regional [Operational Programmes](#), for the respective regions of North, South, East and West Netherlands:

The S3 priorities do not cover language technologies. But they do stimulate cross over technologies. For concrete project suggestions in this area they are happy to look for possibilities.

Contact: Jean Christophe Spapens

¹ TILDE is a board member of LTI and there are well established contacts between LTO and TILDE.

Overall [S3 priorities](#) for Netherlands.

REMARK: Among their priorities are also Open Data which might be a window of opportunity to use public data as language resources.

S3 priorities of other regions:

[Northern Netherlands](#)

[Southern Netherlands](#)

4.18 POLAND

The priorities of Poland are set in Regional [Operational Programmes](#), complemented by 4 thematic Operational Programmes: Digital Poland (that is aligned to the EU Digital Agenda), Smart Growth, Infrastructures & Environment, and Technical Assistance.

[4.18.1 LOWER SILESIA \(DOLNOSLASKIE\)](#)

The Strategic Framework for Smart Specialisations of Lower Silesia includes, among others, ICT eCommerce and SMEs on-line. This may be a possibility for LT.

Contact: Justyna Lasak

[S3 priorities](#) for Dolnoslaskie.

[4.18.2 KUJAWSKO-POMORSKIE](#)

Given the use of ESIF for LT, all the regional branches of smart specialisation can be connected with your action because of a horizontal character of the action. Every enterprise or research institute that wants to develop a project regarding language technologies can apply for ESIF (ERDF) responding to every call for proposals within axes 1 and 2 of the Regional Operational Programme 2014-2020. The specific criteria for the calls should be announced soon. It's hard to indicate clearly which branches or which calls for proposals can be the best to implement your action. I'd like to recommend you cooperation with certain regional partners that could be deeply interested in language technologies.

Contact: Marta Dolecka

[S3 priorities](#) for Kujawsko-Pomorskie.

S3 priorities of other regions:

[Lodzkie](#)

[Lubelskie](#)

[Lubuskie](#)

[Malopolskie](#)

[Mazowieckie](#)

[Opolskie](#)

[Podkarpackie](#)

[Podlaskie](#)

[Pomorskie](#)

[Slaskie](#)

[Swietokrzyskie](#)

[Warmisko-Mazurskie](#)

[Wielkopolskie](#)

[Zachodniopomorskie](#)

4.19 PORTUGAL

Portugal has regional [Operational Programmes](#) as well as 3 thematic ones: Competitiveness & Internationalisation (where there could be reasonable space for LT), Sustainability & Resource Use Efficiency, as well as Technical Assistance.

Overall [S3 priorities](#) for Portugal.

S3 priorities of the regions:

[Alentejo](#)

[Algarve](#)

[Centro](#)

[Lisbon](#)

[Norte](#)

[Madeira](#)

[Acores](#)

4.20 ROMANIA

Romania has 4 Operational Programmes that are horizontal and cover: Large infrastructure, technical assistance, competitiveness, and regional [Operational Programmes](#), the latter for regional development of all regions:

[S3 priorities](#): Among the priorities with potential relevance for LT are: Analysis, management and security of big data, Future internet, Software development technologies, instruments and methods, high performance computing and new computational models. Furthermore, the cultural and creative sector may be open to LT.

4.20.1 VEST (WESTERN ROMANIA)

In Romania, the smart specialisation strategy has a different status. In small countries RIS3 is at national level (Hungary), in developed countries or in those where regions do have autonomy RIS3 is only at regional level. In Romania, the national authority developed its own RIS3 as a policy document that is a basis for supporting RDI investments from public money. They do foresee Big Data and Data Analytics smart specialisation areas.

Also some of the regions (Including Western Romania) did develop their RIS3 based on the guidance of S3 platform although there is no regional budget for innovation to be coordinated by the Agencies. The public financing of the RDI projects is based on other national strategies that are not connected with the regional RIS3. Concerning the implementation of soft projects like proposing regulation changes, West RDA has no regulatory power but it can contribute to awareness raising. The structural funds targeting projects concerning innovation, research infrastructure and universities and companies partnership, is coordinated by the national authority under the Ministry of Education so it is clearly a gap between the approaches level.

The major problem in Romania is that the Regions may propose policies and may elaborate RIS but they do not have a mandate to implement the whole regional innovation policy because they do not have a budget.

The chance of a stakeholder to develop a project on LT is to access money on innovation from national sources or from Regional Structural Funds supporting competitiveness on various sectors or technology transfer. There is no call especially for ICT companies within the regional funds.

Contact: Cristian Gotis

[S3 priorities](#) for Vest Romania.

Nord Vest (North-West)

The North-West region does not have a final smart specialization strategy, thus we do not have any smart specialization domains identified yet based on the application of the methodological approach proposed by the Commission.

If these technologies could be recognized and find a window within the specialization they will have a chance to compete for funding through competitive calls.

Contact: Petra Szávics

4.21 SLOVENIA

Slovenia has one [Operational Programme](#) for the implementation of the EU cohesion policy: Its Smart Specialization Strategy recognized 9 priority areas where ESIF funding for R&D will be focused. Companies, institutes and universities will have the opportunity to participate within several calls for proposals that will be dedicated for R&D support. The calls will be prepared by different ministries, mostly the Ministry of economic development and technology as well as the Ministry of education, science and sport.

Contact: Marko Hren

Overall [S3 priorities](#) for Slovenia.

[National website](#) for smart specialisation (in EN and SI)

4.22 SLOVAKIA

Slovakia has 5 thematic Operational Programmes nation-wide - Human Resources, Research & Innovation, quality of Environment, Integrated Infrastructures, and Technical Assistance - as well as one [Integrated Regional Operational Programme](#).

[S3 priorities](#) of Slovakia overall.

4.22.1 BRATISLAVA KRAJ REGION

If anybody would like to develop a project regarding language technologies, it can apply for ESIF funds via national OP Research and Innovations (OP Výskum a inovácie), Cross-Border-Cooperation Programme Slovakia – Austria or Cross-Border-Cooperation Programme Slovakia – Czech Republic, concerning field of research and development.

Contact: Pavol Stano

[S3 priorities](#) of Bratislava Kraj region.

4.23 SPAIN

Spain has regional [Operational Programmes](#) as well as three cross-cutting thematic Operational Programmes on Sustainable growth, smart growth and SME Initiative:

While ESIF is governed at regional level, the very new national programme “Plan de impulso” for language technologies dedicates funding specifically to LT. This programme will be discussed in D3.3 on national funding opportunities.

4.23.1 ANDALUCIA

The Innovation and Development Agency of Andalusia ([IDEA Agency](#)) is the Andalusian Government’s agency for regional development and is focused on fostering the innovation within the Andalusian society.

It has identified some priorities that may open a window of opportunity for LT.

[S3 priorities](#) for Andalucia.

4.23.2 ARAGÓN

Some priorities may open a window of opportunity for LT.

[S3 priorities](#) for Aragon.

4.23.3 CANARIAS

In Canarias, the ASCII ([Agency for Research, Innovation and Information Society](#)) is in charge of the competences relating to public policies and public programs in research, technological development and innovation and deployment of information societies of Public Administration of the Autonomous Community of the Canary Islands. [S3 priorities](#) for Canarias.

4.23.4 CANTABRIA

In Cantabria, there is a database where all subsidies of the [Cantabria Government](#) are collected. The funding grant called [INNOVA](#), which counts with ERDS funds, can be outlined. It is aimed at encouraging industrial research and innovation in companies by supporting projects of industrial research and experimental development. Although this line is not specific for LT, they can be included if taking into account the article 2 INN/5/2015.

Some priorities may open a window of opportunity for LT.

[S3 priorities](#) for Cantabria.

4.23.5 CASTILLA Y LEÓN

In Castilla y León, two main organizations deal with RDI activities:

Enterprises: ADE agency ([Agencia de Innovación, Financiación e Internacionalización de Castilla y León](#)), which counts with ERDS funds, expects to provide business instruments to support its R+D+i projects 2016-2020, where language technologies can be included.

Research Centers: Dirección general de Universidades e Investigación.

[S3 priorities](#) for Castilla Y Leon.

4.23.6 CASTILLA-LA MANCHA

Some priorities like tourism, ICT or health may provide opportunities for LT.

[S3 priorities](#) for Castilla La Mancha.

4.23.7 CATALUNYA

In [ACCIO](#), there are several funding opportunities related to Language Technologies, such as:

(1) Programa de acreditación de Comunidades RIS3CAT, with ERDS funds, [Call](#), [Webpage](#):

(2) Programa de Núcleos Locales e Internacionales, [Call](#), [Webpage](#)

S3 priorities include culture and creative industries related to tourism:

[S3 priorities](#) for Catalunya.

4.23.8 COMUNIDAD DE MADRID

Several of the identified priorities may include LT.

[S3 priorities](#) for Comunidad de Madrid.

4.23.9 COMUNIDAD FORAL DE NAVARRA

Currently, the [Fourth Technology Plan of Navarre](#) (2012-2015) focuses on increasing the competitiveness of companies and highlights the importance of open innovation for achieving the internationalisation of the regional innovation.

[S3 priorities](#) for Comunidad Foral De Navarra.

4.23.10 COMUNIDAD VALENCIANA

In the Comunidad Valencia region, the IVACE institute ([Institut Valencià de Competitivitat Empresarial](#)), in particular, refers to the promotion of R&D+i for business competitiveness. Calls information (2014 and 2015) can

be found [here](#). In this sense, any of the calls with ERDF funds could host projects in the language technologies field, if prioritized.

[S3 priorities](#) for Comunidad Valenciana:

4.23.11 EXTREMADURA

In 2014, the '[Fifth RTD Regional Plan of Extremadura 2014-2017](#)' was approved. The objectives of this new Plan include improving human capital in the region to encourage research careers, promoting the scientific and technical excellence in research in the region, boosting the R&D activity in the business sector of Extremadura, improving the coordination and access to scientific and technological infrastructures, and encouraging the scientific, technological and innovative culture in the society.

[S3 priorities](#) for Extremadura.

4.23.12 GALICIA

Galicia by the [Xunta de Galicia](#) supports the research through the Technological research, development and innovation plan. The Axencia Galega de Innovación (GAIN) is an entity of the Xunta de Galicia responsible of supporting Galician companies to become more competitive and boosting its growth on solid and sustainable over time basis, through innovation and creative entrepreneurship.

[S3 priorities](#) for Galicia.

4.23.13 BALEAR ISLANDS

Some priorities identified could be used for LT.

[S3 priorities](#) for Balear Islands region.

4.23.14 LA RIOJA

Some priorities identified could be used for LT.

[S3 priorities](#) for La Rioja region.

4.23.15 BASQUE COUNTRY

The Basque Country region gives support to research and innovation through its Science and Technology Plan. [INNOBASQUE](#) organization can be outlined. In all the Plans, the language technologies have been identified as strategic area. These Plans have been provided grants for language technologies during the last 10 years.

[S3 priorities](#) for Basque Country.

4.23.16 PRINCIPADO DE ASTURIAS

Among Asturias RIS3 priorities, a field of specialization called data analysis has been identified, which includes Big Data and support systems and where Language Technologies can be included. According to the funding opportunities, an innovative instrument called [Proof of Concept](#) has been launched.

Asturias counts with 253,544,257.00 € ERDF funds for 2014-2020 period. The operational programme focuses on 9 thematic objectives. The three main priorities are:

- Priority axis 1: Strengthening research, technological development and innovation (25.26 %);
- Priority axis 3: Enhancing the competitiveness of SMEs (30, 90 %);
- Priority axis 6: Protecting the environment and promoting resource efficiency. (20.26 %).

[S3 priorities](#) for Principado De Asturias region.

4.23.17 MURCIA

The operative programme counts with 296,405,884.00 € ERDF funds and will focus on four main priorities (% of funding):

- Knowledge and innovation (30.6%); - LT can be included
- Enhancing SME's competitiveness (18.7 %); - LT can be included
- More efficient use of resources (35.4%); - LT can be included
- Social inclusion and education (12%)

[S3 priorities](#) for Murcia region.

4.24 SWEDEN

Sweden has regional [Operational Programmes](#) as well as two horizontal ones that deal with growth and employment and SMEs.

Overall [S3 general](#) for Sweden.

4.24.1 SKÅNE LÄN

Smart specialization includes new services for eHealth and wellbeing that could somehow be interesting for LT.

Contact: Maria Lindbom

[S3 priorities](#) for Skan Lan region.

4.24.2 ÖSTERGÖTLAND

One of the Smart Specialisations in this region is ICT that include smart and secure connected products and systems, systems of secure, Internet-integrated, communicating electronics and sensors.

Contact: Peter Larsson

[S3 priorities](#) for Ostergotland region.

[Dalarnas](#)

[Gävleborgs](#)

[Örebro](#)

[Stockholm](#)

[Värmlands län](#)

[Västra Götalands län](#)

[Södermanlands län](#)

4.25 UK

UK has 6 regional [Operational Programmes](#) for ERDF.

4.25.1 SCOTLAND

In Scotland ERDF activity in the current programme (2014-2020) is delivered through a new governance structure that targets funds around a number of key themes. The disbursement of ERDF is through Strategic Interventions; each Strategic intervention is under the control of different Lead Partners. Lead Partners are organisations which have the skill, expertise and capacity to manage these Strategic Interventions. The Strategic Intervention for Innovation has three Lead Partners; our two economic development agencies, Scottish Enterprise and Highlands and Islands Enterprise; and the Scottish Further and Higher Education Funding Council, and it is to the Lead Partners that any application for ERDF funding should be made.

Each of these Lead Partner organizations receives funding from the Scottish Government which enables them to design and deliver a range of programmes that support innovation and RTD actions along the entire technology readiness level – from developmental research, proof of concept through to production, marketing and internationalizing. Support is not limited to areas of key specialisms – there is sufficient flexibility within the range of programmes on offer to support new and emerging activities which have high growth or transformational potential.

More information on the Scottish ERDF programme is available [here](#).

Contact: Anne Buchanan

[S3 priorities](#) for Scotland region.

4.25.2 WALES

Wales has offered some support in the past to language technologies indirectly through some of our ERDF supported projects. Most of our academic capability appears to be at Bangor University with a rather dispersed private sector mainly related to Welsh-English translation for publication. We have not identified significant machine translation or voice recognition activities within Wales.

Contact: Alastair Davies/Sara V. Lloyd
